How to use these prompts

Each prompt in this guide is ready to use. You do not need special software or experience with AI. If you can copy and paste, you can use this guide.

1
Copy a prompt from any page.

2
Paste it into any AI chat tool you already use.

3
Replace every [bracketed] part with your own business details.

4
Edit the result in your own voice before you post it.

The words inside square brackets are placeholders. For example, if a prompt says **[your business type]**, replace it with what you actually do - such as a bakery, a salon, a clothing shop or a coaching service. Add your city, your product names and your offer where the prompt asks for them. The more specific you are, the more useful the answer will be.

Read every answer before you publish it. Check names, prices, dates and claims, and change any line that does not sound like you. Use these prompts as a strong first draft, not as a finished post.

Tip: Save the answers you like. Over a few weeks you will build a small library of captions, scripts and ideas written for your business, which makes the next month of content much faster to plan.
